Summary

Highly motivated and detail-oriented individual with a strong passion for AI and software development. Proficient in Java, JavaScript, and Python, with experience in developing scalable and efficient applications. My top projects include AI Resume Optimizer and AI Job Search Platform, which showcase my expertise in AI integration, natural language processing, and full-stack development.

Education

United College of Engineering and Research <i>B.TECH CSE</i>	2019-2023 <i>Prayagraj, Uttar Pradesh</i>
M.J.R.P . Public School <i>Senior Secondary(XII)</i>	2018-2019 <i>Ghazipur, Uttar Pradesh</i>

Technical Skills

- **Programming Languages:** Java, JavaScript, Python
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Streamlit
- **Backend:** Fast API, Spring Boot, Node.js, REST APIs, JWT Authentication
- **Database:** MySQL, PostgreSQL
- **AI/ML/Data Science:** LLM Integration (Gemini API, Groq API), Prompt Engineering, Resume Parsing
- **Tools:** Git, GitHub, VS Code, IntelliJ IDEA

Projects

AI Resume Optimizer <i>Python, Groq API, AI Integration, Streamlit, PyPdf</i> • Links: GitHub Frontend GitHub Backend Live • AI Resume Optimizer is a Streamlit-based Python application that tailors resumes to specific job descriptions using LLMs. • Manual Form Mode: Easily input contact, education, and project details structured for resume generation. • PDF Parser Mode: Instantly extract and populate information directly from existing PDF resumes. • AI Tailoring Mode: Optimizes your resume against target Job Descriptions using Groq API for maximum ATS compatibility.	2026
AI Job Search Platform <i>React.js, Spring Boot, PostgreSQL, AI Integration, REST API, JWT Auth</i> • Links: GitHub Frontend GitHub Backend Live • Developed an AI-powered job search platform to match candidates with relevant job opportunities. • Built an AI Resume Engine using Gemini API with Groq fallback to extract skills and generate summaries. • Implemented predictive match scoring to calculate compatibility between user profiles and job requirements. • Integrated Adzuna API for real-time job listings with dynamic filtering.	2026
Mapify <i>React.js, Spring Boot, PostgreSQL, Leaflet</i> • Links: GitHub Frontend GitHub Backend Live • Built a full-stack real-time location sharing app using React.js and Leaflet with interactive map visualization. • Developed secure Spring Boot REST APIs with JWT authentication and PostgreSQL for user and location data management. • Integrated frontend and backend for live location updates, friend requests, and secure API communication.	2025

Certifications

• Core and Advanced Java	<i>United College of Engineering and Research</i>
• MERN Stack	<i>Digipodium</i>

Achievements

- Qualified GATE 2025
- 5 star in Python, Java, SQL on HackerRank
- 150+ coding challenges across HackerRank, LeetCode, GeeksforGeeks
